67 CUSTOMIZATION

Founded in 1995, Corticeira Viking is a Portuguese company that resulted from a joint venture between a Swedish distributor and a Portuguese manufacturer of cork products.

At first, the activity was focused exclusively on the trade of cork products, but the leadership soon realized that producing indoor would bring more profitability to the company and would allow for a more efficient response to customer's needs.

In a sustained way, the company has been endowing itself with the appropriate machinery, expanding its facilities, investing in human resources and in general, creating conditions to achieve its main goal, which is: customer satisfaction.

The product diversity and versatility, in such areas as houseware, tableware, industrial items, wine and lifestyle products, gives Corticeira Viking a leading edge in a highly competitive market.

Through the years, the company has shown flexibility and openness to adapt to different market needs, showing its ability to respond to new trends. Nowadays, we can proudly say that we can produce a bench or a table for the home, a yoga block and a yoga mat, a lady's wallet, an umbrella, or even a wine cooler! All based on this incredible material that is cork.

In addition, the company has shown the capacity to respond to specific customer requests, either by producing items with personal design or by presenting unique packaging and stamping solutions.

Over the years, Corticeira Viking has been attended at several international fairs, presenting its products to all over the world, not only with the aim of reaching new customers and new markets, but also to make known this unique and special material that is cork.

We've consistently participated in the Ambiente fair in Frankfurt, the leading trade fair for consumer goods. Furthermore, we've also invested in participating in fairs that take place in different markets and segments, such as the Interior Life Style Fair in Japan or the Maison & Objet Fair in Paris, dedicated mainly to the home decor segment.

WHY CORK?

Eco-Friendly Material

Cork is the bark of the cork oak tree (*Quercus suber* L). It is a 100% natural raw material, meaning 100% reusable and 100% recyclable, extracted from cork oaks without harming the environment and without damaging the trees.

Once processed, into stoppers for example, cork can re-enter the production process. The granules resulting from this process can be used as a huge variety of products, such as hot pads, yoga blocks, lamps or toys.

Properties

Lightness, elasticity, impermeability, insulation, resistance to wear, hypoallergenic and fire retardant.

Buying and using cork products contributes to preserve a natural, renewable resource and an important ecological environment in the western Mediterranean countries.

A photograph of a dining table set for a meal. In the foreground, a wine bottle is chilling in a small, light-brown, cylindrical cork barrel. The barrel is placed on a blue and white checkered tablecloth. To the right of the barrel, there are two wine glasses, one partially filled with a light-colored wine. In the background, a white plate and silverware are visible. The scene is lit with warm, ambient light, and a blurred Christmas tree with lights is in the background. A blue rectangular box is overlaid in the upper right corner, containing the word "WINE" in white, bold, uppercase letters.

CUSTOMIZATION

BUILD YOUR PROJECT WITH US!

Our goal is to create products and packing solutions that meet our customer's specific needs. Experience enables us to produce any product from cork. Create and customize your product, from shape to packaging or with the addition of a stamping detail (logo, pattern, illustration, etc.), by laser, screen printing or hot-branding.

Let us have your custom-made inquiries and we will work to realize your project.
